INNER WORKINGS**

The Complete My Big TOE Trilogy
Unifying Philosophy, Physics, and Metaphysics

www.my-big-toe.com

Tom Campbell is a physicist, consciousness researcher, international speaker, and author of the acclaimed trilogy My Big TOE (Theory of Everything). With decades of experience in applied physics and consciousness research, Tom has become a thought leader at the intersection of science and consciousness.

His groundbreaking work explores the nature of reality, consciousness, and human purpose, presenting a comprehensive model of existence that bridges physics, philosophy, and personal growth. As a pioneer in simulation theory, Tom proposes that our universe is a virtual simulation created by a Larger Consciousness System (LCS), and that the purpose of life is the evolution of consciousness through reducing entropy (becoming "love"). His insights resonate with both scientific and spiritual audiences alike. Tom founded Center for the Unification of Consciousness and Science (CUSAC) 501c3 to further research into these fields.

PROFESSIONAL BACKGROUND

- **Physicist:** With over 30 years of experience working with NASA and in military defense systems, Tom specialized in large system simulations, modeling, and physics. Charged with the safety of the Ares 1 mission.
- **Consciousness Researcher:** Since the 1970s, Tom has conducted drug-free experiments in altered states of consciousness at the famous Monroe Institute.
- **Thought Leader:** His expertise in virtual reality theory and consciousness studies uniquely qualifies him to offer a bridge between the scientific and metaphysical worlds.

TOPICS TOM CAN SPEAK ON

- **Simulation Theory:** How our universe functions as a virtual reality.
- **The Science of Consciousness:** Bridging quantum physics and spirituality.
- **Personal Evolution:** Reducing entropy and living a love-based life.
- **Free Will & Choice:** The role of intent in shaping reality.
- **The Nature of Reality:** A new framework that unifies science, philosophy, and mysticism.
- **Paranormal and Mystical:** How strange experiences are normal in a virtual reality universe.

CORE CONCEPTS OF MBT

- **Reality as a Simulation:** Our physical world operates as a virtual reality created by the Larger Consciousness System to foster consciousness growth.
- **The Larger Consciousness System (LCS):** A fundamental, evolving system of which all life is a part of.
- **Entropy and Evolution:** Consciousness evolves by reducing entropy, achieved through choices grounded in love rather than fear.
- **Free Will:** The cornerstone of meaningful interaction within the simulation, allowing for personal growth and system-wide evolution.
- **The Rule Set:** The laws of physics act as constraints within the simulation, creating structure for meaningful experiences and lessons.
